Cardiac Auscultation (see accompanying procedures information for details):

- Auscultation is within normal limits. Additional diagnostic studies are not indicated.
 Auscultation reveals a soft (grade 1 or grade 2) murmur.
 Auscultation reveals a moderate to loud heart murmur.

Description of any cardiac murmur:

Timing: systolic diastolic continuous

Intensity: 1 2 3 4 5 6

Point of maximal intensity: mitral valve area aortic or subaortic area

pulmonary valve area tricuspid valve area

other location _____

Radiation or other characteristics: _____

Echocardiography (see accompanying procedures information for details): *diff*

- Echocardiography with Doppler was performed and the results were within limits of normal.
 Echocardiography with Doppler was performed and the results were equivocal:
mild congenital heart disease cannot be conclusively diagnosed nor excluded based on this study.
 Echocardiography with Doppler was performed and the results were indicative of congenital heart disease.

Describe any abnormal echocardiographic or Doppler findings, including transvalvular or other pertinent velocities in m/sec. _____

Summary evaluation and opinion of the examination

- Normal cardiovascular examination - congenital heart disease is not evident.
 Equivocal cardiovascular examination - congenital heart disease cannot be diagnosed nor excluded
 Abnormal cardiovascular examination indicative of congenital heart disease; indicate diagnosis below:
-OK for breeding & slow

I certify that the standards for cardiac examination as set forth by the ACVIM report were carefully followed in performing this examination.
